SUMMARY

Full-Stack Developer with hands-on experience in TypeScript, JavaScript, React.js, Node.js, and Express.js, building secure and scalable web applications. Skilled in OAuth2, OpenID Connect (OIDC), PKCE, JWT, REST APIs, PostgreSQL, and MongoDB, with a strong focus on performance, reliability, and clean architecture. Seeking a Software Engineer role to contribute across frontend and backend development.

SKILLS

Languages: TypeScript, JavaScript, SQL

Frontend: React.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, OAuth2, OpenID Connect (OIDC), JWT

Databases/ORM: PostgreSQL, MongoDB, Drizzle ORM, Mongoose

Tools & Platform: Git, GitHub, Vercel, Render, Netlify

PROJECTS

TokenShinobi: OIDC Auth Service | 🔄 🌐

TypeScript, Node.js, Express.js, PostgreSQL, Drizzle ORM

- Built an OIDC identity provider implementing Authorization Code flow with optional PKCE (S256/plain).
- Implemented strict redirect URI validation and secure OAuth2 authorization controls.
- Issued RS256-signed access, refresh, and ID tokens; exposed JWKS (/certs) and /userinfo endpoints.
- Developed OAuth client management APIs (register, update, delete, list) with owner-based access control.
- Enforced short-lived one-time authorization codes and refresh-token rotation with PostgreSQL persistence.

Pollify: Polling App | 🔄 🌐

TypeScript, React.js, Node.js, Express.js, MongoDB

- Built a polling platform supporting multi-question polls with single-choice, required/optional fields, and expiry time.
- Integrated OIDC login (Authorization Code + PKCE) using TokenShinobi, with JWT/JWKS validation.
- Implemented response modes (anonymous/authenticated/both) and one-response limits per user/session.
- Added backend validation for required questions and poll expiry enforcement.
- Built real-time creator analytics with Socket.IO, including live vote counts, percentages, and participation metrics.

KahwaCSS: Utility-First CSS Framework | 🔄 🌐

JavaScript, Node.js

- Built a lightweight runtime utility-CSS engine that parses kw-* classes and applies styles without a build step.
- Implemented utilities for spacing, typography, colors, sizing, layout, borders, positioning, and effects.
- Added MutationObserver-based DOM updates with requestAnimationFrame batching and class caching for performance.
- Packaged and published as an npm/CDN-ready library with modular exports and automated parser tests.

EDUCATION

Master of Computer Applications (MCA)

February 2025 – Present

Lovely Professional University

Bachelor of Computer Applications (BCA)

April 2021 – August 2024

S.N. Sinha College, Jehanabad
